SMART, OPTIMA & ADVANCE

The comprehensive MTD product range of motorised garden equipment meets every requirement. Divided into the new SMART, OPTIMA and ADVANCE series, MTD has just the right piece of equipment for every gardening fan – from beginners and amateurs to professional gardeners. In addition to great value for money, MTD products combine impressive technology, outstanding comfort and unmistakeable design.

MTD SMART

The MTD SMART range of garden equipment includes models that are perfect for those who are new to gardening. The beginner's range has high-quality products that offer excellent value for money.

MTD OPTIMA

The new MTD OPTIMA series offers outstanding performance, quality and comfort. For all lawn types, whether medium-sized or large, with trees, shrubs or flower beds or difficult terrain, the amateur gardener is sure to find the perfect appliance in the MTD OPTIMA range.

MTD ADVANCE

Powerful and reliable – full speed ahead. The MTD ADVANCE range of garden equipment meets the requirements of even professional gardeners. Durable equipment offering outstanding performance and comfort for daily lawn maintenance.

Page 31

Ride-on mowers

Really versatile: even plenty of corners are no problem for the new compact and manoeuvrable MTD ride-on mowers with rear discharge. Decide between two new models: MiniRider 60 RD or MiniRider 60 RDE with convenient electric start.

Brushcutters

With working widths of 42 cm and line diameters of 3 mm, the new MTD petrol brushcutters 1033 and 1043 are powerful tools, particularly in high grass or undergrowth. This is also reflected in powerful full crank engines. Of course, accessories such as shoulder straps and safety glasses are included and guarantee easy and comfortable working at any time.

Page 42

Chipper/ shredders

Two robust and reliable petrol chipper/shredders are part of the new MTD product program 2013. The powerful and versatile chipper/shredders have no problem with debris or branches. Of course they confirm to the newest standards and safety requirements.

LAWN MOWER
Detailed solutions which inspire

No garden is alike. Some people can hardly wait to mow their lawn, whereas for others it is a necessity. One thing is certain: Choose the right product and working is fun. MTD certainly has the product to suit your needs.

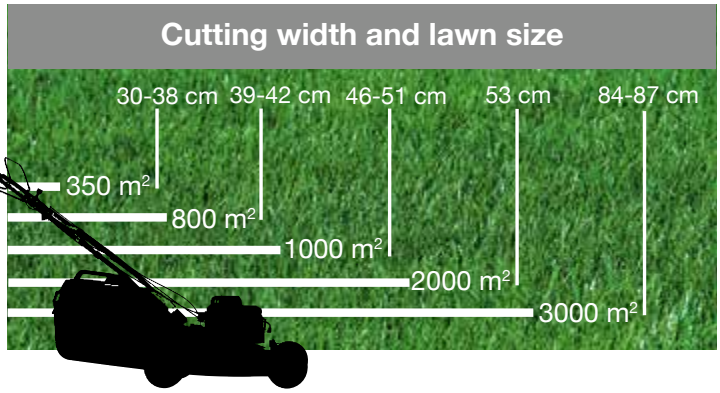
How to choose the right mower?

Type of landscape

Choose a self propelled lawn mower with large wheels for hilly, sloping or uneven ground or for places hard to reach.

Lawn size

To determine the mower best for you please use the symbol you can find beneath every product picture. For a first orientation please use the chart below.



This symbol can be found in the specifications of each product. It helps you to determine the ideal machine for your lawn size.

Mulching, bagging, discharge

When mulching, the grass clippings with their nutrients can ideally be used as a natural green fertilizer.

Lawn mowers with a grass catcher ensure a clean and tidy lawn.

Lawn mowers with rear or side discharge can demonstrate their benefits especially with high or wet grass.

Many of our models offer you two, three or all four options simultaneously or can be easily converted with appropriate attachments.
You can recognise these units by our 2-in-1, 3-in-1, 3-in-1 OPTION or 4-in-1 logo.

1. Discharge
2. Bagging

1. Discharge
2. Bagging
3. Mulching

Convertible from 2-in-1 function to 3-in-1 with optional attachments.

1. Rear Discharge
2. Side Discharge
3. Bagging
4. Mulching

The benefits at a glance

+ *Quiet and environmentally friendly*
+ *Ergonomic handle*
+ *Easy to handle due to light weight*
+ *Precise and clean cutting pattern*
+ *Solid steel deck*
+ *Foldable handle to save storage space and for easy transport*

Your little helper for a clean cut!

REEL MOWER

Ideal for small lawns and front gardens

The new reel mower from MTD is your ideal helper for small lawns and front gardens. The MTD reel mower is operated by hand, making it very quiet, and requires no electricity or petrol. Furthermore, the mower is low maintenance, environmentally friendly and cost-efficient.
The MTD reel mower benefits from being light weight and is therefore easy to manoeuvre. The foldable handle also allows the mower to be stored away easily in compact spaces. Its special cutting technique carefully produces a clean and precise finish. Anyone looking to invest more time in the care of their lawn without considering it simply a chore will soon be rewarded with a perfectly maintained English lawn when using the MTD reel mower.

- *High cutting performance*
- *Powerful MTD ThorX OHV engines*
- *Easy mowing on uneven fields with all MTD SMART self propelled lawn mowers*

Reliable and robust

MTD SMART PETROL MOWERS

Ideal for medium-sized lawn areas

Easy handling, reliable and robust – this is the MTD SMART beginner's range. All lawn mowers are fitted with the quiet MTD ThorX OHV engine, guaranteeing effortless and reliable work. Two levers operate a height adjuster with six cutting positions, which are easy to change and allow you to adjust the cutting height to all conditions. MTD SMART lawn mowers are available as push mowers with working widths of 42 cm and 46 cm and as lawn mowers with rear wheel drive with working widths of 42 cm up to 53 cm.
When mowing you can decide whether to collect the grass clippings or to leave them on the lawn. The mowers are fitted with a grass catcher with a 60 or 70 litre capacity and a large opening for easy emptying.

MTD ThorX OHV engine

All MTD Smart petrol lawn mowers are equipped with the MTD ThorX OHV engine:

- OHV design locates the valves and spark directly above the piston, in the center of the combustion chamber assuring the hottest and most efficient combustion of the fuel air mixture.
- Benefit:
  - more power
  - less consumption
  - less emission
  - less noise

MTD OPTIMA PETROL MOWERS

Ideal for medium-sized to large lawn areas

Do you have larger areas to mow, on uneven land or a sloping lawn? Then let the MTD OPTIMA range of petrol lawn mowers come to your assistance. They are equipped with a central cutting height adjustment and high performance engines to make work more comfortable. You can choose between push mowers and self propelled mowers and between lawn mowers with and without high rear wheels to work on all kind of fields. The handles on the lawn mowers are fully foldable, enabling easy storage in minimum space. The grass clippings can either be collected or discharged. Some models include a mulch kit in the delivery. All other MTD OPTIMA lawn mowers can be equipped with a mulch kit as accessory. The large capacity grass catchers which can be easily pulled through the handle and easy manoeuvrability complete the extensive list of features offering comfort and performance in the MTD OPTIMA range of petrol lawn mowers.

The benefits at a glance

Matured technology in every detail

MTD ADVANCE PETROL MOWERS

Ideal for medium-sized to large lawn areas

High level technical requirements and large-scale performance – the MTD ADVANCE range of petrol lawn mowers is the dynamo needed for professional requirements. They are the ideal mowers for medium-sized to large lawns between 800 m² and 1300 m² with bushes, trees and slopes. Thanks to the extremely quiet and high performance four-stroke Kawasaki engine, which transmits power to the high rear wheels, even mowing uphill can be comfortably achieved without strenuous pushing. You can mow and mulch, and both side and rear discharge are available. The speed on model ADVANCE 53 SPKV HW can be adjusted using the advance speed control lever on the handle and thereby optimally set at walking pace. Sturdy steel deck, easy to use central cutting height adjustment, foldable handle and grass catcher with hard top and integrated bag full indicator complete the features of theMTD ADVANCE petrol lawn mowers.

With the variable speed control the ground speed of model ADVANCE 53 SPKV HW can indiviually and continously be adjusted to your walking speed.

1 machine - 4 functions
With the MTD ADVANCE petrol mowers you can not only bag or mulch the grass clippings, but also choose between side discharge and rear discharge.

High rear wheels

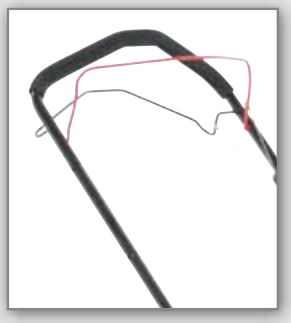
High rear wheels improve the manoeuvrability in case of hilly, sloping or uneven ground.

Fully foldable handle

For an easy and compact storage and transport you can completely fold the handle to reduce the space needed.

Central cutting height adjustment

The cutting height can be adjusted centrally in one of 6 positions



Ergonomic handle

The ergonomic handle with foam grip permits you to have the best control of your mower with a premium comfortable position reducing the effort of mowing.

Grass clippings – a valuable green fertiliser

MTD SMART MULCHING MOWER

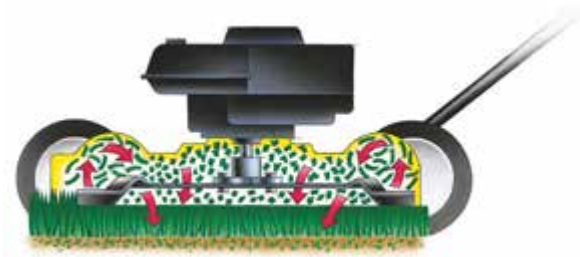
Ideal for medium-sized lawn areas

Mulching is a clever kind of lawn maintenance that also saves time because there is no grass catcher to empty. The grass is repeatedly cut until it becomes very small. Then it is deposited back into the lawn as a provider of moisture and natural fertiliser. Reusing your clippings protects your lawn against excessive sunlight. So it maintains its healthy green colour. MTD offers you the ideal mulching mower. With a specially shaped mulching deck, it offers excellent results.

The benefits at a glance

+ *Easy to use*
+ *Compact and light weight mower*
+ *Optional mulching or side discharge*
+ *Fully foldable handle*
+ *Powerful engine*
+ *High cutting performance*

	G 46 MO
Engine	MTD ThorX 45, 139 cm³
Rated power (kW / min⁻¹)	2,0 / 3000
Start	pull
Wheels (f / r)	200 mm / 200 mm
Deck material	steel
Cutting width	46 cm
Height adjustment	9 positions, individual
Cutting height	35-100 mm
Grass catcher	-
Mulch kit	included
Handle	StandardHandle, fully foldable
Handle height adjustment	2 positions
Weight (approx.)	26 kg



Characteristic for a mulching mower are the domed shape of the cutting deck and the specially shaped mulching blade. Thanks to its profile it creates an air vortex inside the cutting deck that keeps the clippings suspended and swirling around long enough for them to be cut into fine pieces. This way you can literally make your clippings disappear.

Keyword:
Mulching

1. Mulching saves time

There is no collecting and disposal of the clippings.

2. Mulching saves money

Reduce your fertiliser and irrigation costs. Clippings are a valuable natural fertiliser for your lawn.

3. Mulching protects your lawn

Reusing your clippings protects your lawn against excessive sunlight. So it maintains its healthy green colour.

To maximise the benefits of mulching, you should never remove more than one third of the height of the grass with each mowing (max. 3 cm) and you should mow regularly; once or twice a week in the main growth period.

Full power and performance – without gasoline or cables

MTD OPTIMA LI-ION LAWN MOWER

Ideal for small lawn areas

The MTD LI-ION lawn mower is especially suited for mowing allotments, housing developments and small house gardens. Powerful and precise, with a fully charged battery it can mow lawns of up to 250 m², without annoying cables or emissions and with the optional interchangeable battery pack you can even extend the area that can be covered individually.

The lithium-ion mower from MTD is designed to give you the best result in the most eco-friendly way in terms of noise and emission.

Equipped with an array of comfort features, such as a collecting bag with fill indicator, handle height adjustment, central cutting height adjustment and an external charger, the MTD LI-ION mower is the perfect alternative to electric lawn mowers with cables.

To ensure that your lawn can breathe deeply

MTD SMART ELECTRIC AND PETROL SCARIFIER

Take a deep, conscious breath… That‘s the way your lawn feels after scarification. Twice a year - ideally a dry day in spring or autumn - you should free your lawn from felt. The felt layer is a breeding ground for fungi, binds moisture and inhibits a powerful root growth of your lawn. MTD offers you a number of scarifier, which fulfill exactly your needs.

MTD Electric Scarifier

The powerful electric scarifier are especially suitable for smaller and medium-sized lawns. They are extremely robust, very comfortable and easy to handle. With the powerful engine and working widths of up to 40 cm you can comb through your lawn fast and uncomplicated.

MTD Petrol Scarifier

With our petrol scarifier you have a machine with 21 or 24 blades. The working depth can be adjusted central, continuous and comfortable. Fixed tines made of special steel do thorough work when scarifying: Like a bucket wheel they remove the felt from your lawn and comb the scarified material out of the lawn.

The benefits at a glance

+ Removes plant remains, moss and weed
+ Stimulates healthy lawn growth
+ Aerates the ground so that water and nutrients can be better absorbed by the ground and feed the lawn

LAWN TRACTORS
Versatile and comfortable

How to choose the right lawn tractor?

Type of landscape
Choose a product with wider wheels and a powerful engine for a hilly or sloping ground. Our pendulous suspended cutting deck is excellent for larger and uneven lawn areas as it can easily adapt to the ground.

Lawn size
The size of the lawn area is one of the key factors for choosing the right product. To determine the appropriate working width, please use the chart below or use the symbol you can find beneath every lawn tractor.

CUTTING WIDTH	60 cm	76 cm	92-96 cm	105-107 cm
LAWN SIZE	500 m²	800 m²	1500 m²	2000 m²

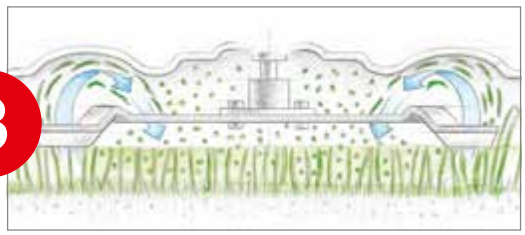
This symbol can be found in the specifications of each product. It helps you to determine the ideal machine for your lawn size.

Mulching, bagging, discharge

1 Bagging
To achieve a professional, perfect cut, the grass clippings can be bagged and composted separately. On all models with rear discharge, the grass catcher can be emptied comfortably from the driver's seat.

2 Discharge
The clippings can be discharged with the aid of a deflector. This is particularly recommendable when the grass can be left on the ground.

3 Mulching
Mulching has the advantage that the soil is fertilised with the grass clippings. In this way the clippings with their nutrients can ideally be used as natural fertiliser. Mulching is recommendable in the dry summer months to prevent the lawn from drying out. Almost all models can be equipped with an additional mulch kit.



With a few simple steps you can adapt the use of your tractor to the season and the operating condition. To allow you to choose according to your needs, many of our tractors have two or all three functions simultaneously or can be converted with appropriate attachments. You can recognise these machines by our 2-in-1, 3-in-1 or 3-in-1 OPTION logo.

2-in-1

1. Discharge
2. Bagging

3-in-1

1. Discharge
2. Bagging
3. Mulching

3-in-1 OPTION

Expandable from 2-in-1 function to 3-in-1 function with appropriate attachments.

Transmissions

Rear discharge

Side discharge

Transmatic transmissions

Shift-on-the-go.

The Transmatic transmission allows for continuously variable shifting. Choose your basic speed by moving the speed shift lever and start mowing. By pressing on the brake pedal you can slow down your speed and start again without having to change gears. Releasing the brake pedal, the tractor automatically resumes your preset speed.

Hydrostatic transmissions

The hydrostatic transmission allows for smoothly and precise manoeuvring. On our tractors with rear discharge, you can control velocity as well as the infinitely variable forward and reverse speed by the tilt foot pedal. Thus, you can leave both hands at the steering wheel, there is no need to operate the clutch or shift gear. On our tractors with side discharge, the drive can be handled very comfortable by manual lever.

Our tractors

Clever in every detail

Ergonomically arranged control elements

Turf saving wheels

Mowing deck with anti-scalp wheels to prevent damages of the grass surfaces

Almost all tractors with rear discharge have a grass catcher which is easy to empty from the driver's seat

Small turning radius for very good manoeuvrability

Tractors with rear discharge and a two-blade system have counter-rotating blades which transport the clippings very effectively into the grass catcher

Fully forward-folding and removable one-piece hood for easy maintenance

Step through frame makes getting on and off extremely comfortable

Pivoting front axle for an even and professional cut even over bumpy terrain.

Several lawn tractors by MTD are equipped with a deck wash nozzle for easy cleaning of the deck.

MTD SMART LAWN TRACTORS

with rear and side discharge

Do you have a large lawn to mow and want the job done as quickly as possible? Then the MTD SMART lawn tractor is the perfect choice for you, whether you opt for a rear discharge or side discharge model. Once you have mown your lawn with this, you'll probably never go back to a hand-guided mower. MTD SMART lawn tractors are practical, robust and reliable, and with a cutting width of 76 cm to 107 cm, they are ideal for areas measuring 1000 m² to 2000 m².

Thanks to the small turning radius of 46 cm, mowing around bushes and beds is safe and simple. All tractors also have a step through frame, making it easy to get on and off; a beverage holder, an adjustable seat, head lights and ergonomically designed control elements for deck engagement and transmission. The cutting height can be easily adjusted to five positions between 30 mm and 95 mm.

Real workhorses

MTD OPTIMA LAWN TRACTORS

with rear and side discharge

Comfortable and versatile – you won't have to sacrifice a thing with MTD OPTIMA lawn tractors. With a cutting width of 92 cm to 107 cm they are real workhorses and ideal for mowing even large surfaces.
All MTD OPTIMA lawn tractors are fitted with a high-performance engine, guaranteeing high performance and long service life. They are fitted with particularly low-maintenance and a robust transmission as standard for a smooth and comfortable ride. The fully forward-folding and removable hood also gives easy access for maintenance work at any time.
The floating deck adapts to uneven ground on rough terrains and can be cleaned with the utmost ease and convenience, thanks to the deck wash nozzle that is included for practically all MTD OPTIMA lawn tractors. In addition to the many comfort features of MTD SMART lawn tractors, MTD OPTIMA lawn tractors also impress with their "Ready to go" feature, whereby they are operational within just a few minutes. A battery charger is included in the delivery.
Thanks to the addition of useful accessories such as a dozer blade, lawn sweeper and spreader attachment, a wide range of home and garden jobs can be completed more quickly and easily all year round.

MTD OPTIMA lawn tractors are operational within just a few minutes.
For example you have a full battery.

All you have to do now is:
- attach the steering wheel (tools are included in the delivery)
- insert the seat and screw tight
- connect the two battery cables
- mount the pre-assembled grass catcher (for MTD OPTIMA lawn tractors with rear discharge)
- fill up with fuel, check oil levels and top up oil if necessary. This saves you time and reduces the effort to start up your lawn tractor for the first time to a minimum.

Get on and go!

MTD RIDE-ON MOWERS

Our ride-on mowers are really versatile: They can optionally bag, discharge or mulch the clippings. They are ideal for gardens where the use of a tractor is restricted by flowerbeds, bushes or other obstacles. They are attractive in design and easy to operate. You can effortlessly mow your lawn sitting down – even gardens with plenty of corners are no problem.

Thanks to their small dimensions they are manoeuvrable and compact and after use they can be stored in a space saving way.

MTD ride-on mowers take up barely more space in storage than a comparable walk-behind mower. The MTD ride-on mowers with rear discharge can also be stored in a space saving way by easily removing the grass catcher.

INNOVATION 2013

MTD SMART RIDE-ON MOWERS

with rear discharge

Large grass catcher

Laterally displaced deck allows mowing close to edges

Step through frame makes getting on and off extremely comfortable

The cutting height can be adjusted between 38 an 95 mm in 5 positions

MTD OPTIMA RIDE-ON MOWER

with side discharge

The MiniRider 76 SD features a 420 cm³ MTD tractor engine and combines all the advantages of a ride-on mower with the performance of a lawn tractor. The level indicator allows you to monitor the large 4.9-litre fuel tank conveniently at any time. The Transmatic transmission with 6 different drive settings allows you to change gear easily while on the move, making the MiniRider 76 SD an extremely smooth ride. The step-through frame has no pedals or switches to get in the way, which means getting on and off is even easier and safer.

When manoeuvrability and time matter

MTD OPTIMA ZERO-TURN RIDING MOWER

The zero-turn riding mower featuring a side discharge deck combines the manoeuvrability of a zero-turn riding mower with outstanding performance and comfort. This mower is especially suitable for large lawns with trees and bushes – thanks to its extreme flexibility, the grass around these does not need to be cut separately. What's more, its compact size and zero turning radius make this mower perfect for manoeuvring through very tight spaces.

The benefits at a glance

- *+ No turning radius*
- *+ Extremely manoeuvrable*
- *+ Adjustable dual levers*
- *+ Dual front caster wheels provide added mano-euvrability and stability over different terrain*
- *+ Electric PTO for smoother deck engagement*
- *+ Hour meter*

Prepared for the onset of winter

LAWN TRACTOR

with winter equipment

Clear snow and ice from paths and driveways quickly and easily by using winter equipment for lawn tractors with rear or side discharge. The laborious task of clearing snow is now a thing of the past thanks to a snow plough blade measuring 117 cm wide that can be easily lifted or lowered from the driving seat. Prevent damage to the ground at the same time by using the compatible rubber lip. Our snow chains also provide maximum traction at all times and ensure you do not skid on icy surfaces. One of our trailer spreaders can also be used for additional support when clearing snow and ice.

The perfect cut!

MTD HEDGE SHEARS

Save power while working in every cutting situation

It is easy to get the perfect cut using the MTD hedge shears. Their low weight and cutting widths of up to 61 cm save power and are easy on the joints while working in all the cutting situations.
Thanks to the motor power of up to 600 watts, the electric MTD hedge shears are the optimal solution for cutting medium sized hedges effectively. Both the models are provided with a quick-stop function which stops the blade in less than 0.5 seconds and hence ensures work safety at all times. In addition to the two electric models, the new petrol-operated hedge shear with its pivotable handle and a powerful 2-stroke motor is impressive.

The ergonomic design and the ideally balanced centre of gravity guarantees comfortable use. The laser cutted and diamond-grinded blades ensure an excellent cutting profile.

ELECTRIC HEDGE SHEARS

	HT 51 E	HT 61 E

EDGER

For whole variety of edges

Are your paths and borders overgrown? No problem - MTD edger quickly and efficiently remove overgrowth. Edges of flowerbeds, flagstones, paths or walls are cut cleanly; your garden will look perfect.

The benefits at a glance

- *Edger with 23 cm edge blade*
- *3 way edging ability: edge, bevel and trim*
- *Steel frame*
- *Individually adjustable curb wheel offers versatility regardless of curb height or shape*
- *Rotating head allows three different angles for precise bevel cuts*
- *Foldable handle saves time and space making the unit easy to set up and to store or transport*

	550 G
Engine	B&S 450

Bevel adjustment	3 positions, angle adjustable
Curb wheel	standard
Blades	23 cm diameter, steel - Dual Tip
Wheels (f / r)	180 mm / 200 mm
Handle	Loop
Weight (approx.)	23,5 kg

For a perfect finish!

TRIMMER/BRUSHCUTTERS

With electric or petrol engine

MTD offers a wide range of trimmers and brushcutters with electric or petrol engine.
The trimmers and brushcutters are equipped with the Tap Feed system which readjusts the length of the cutting string by pressing it on the ground. The spool can be replaced easy and quick.
Many models also include the clutch system for TrimmerPlus attachments. So your trimmer turns easily into a pole saw, a hedge trimmer, a cultivator or a blower.

Advantages of a 4-cycle-engine compared to a 2-cycle-engine:

- Cleaner emissions
- High efficiency due to OHV technology
- Odourless because of low oil combustion
- Easy to use – easy starting process
- Quieter than a 2-cycle engine
- No Mixing of petrol and oil

With the starting system “AST”, starting a two-stroke engine with a rope is very easy. The “Advanced Starting Technology” (AST) has a coil spring which facilitates the starting process - you only have to pull the rope smoothly and easily. The engine will start at its own

FULLCRANK ENGINE

The MTD brushcutters 827, 827 M, 1033 and 1043 are equipped with a full crank engine which offers the following advantages:

- Less vibration
- Longer engine life
- Smaller tolerances
- Very well balanced crankshaft

TrimmerPlus

Clutch system for attachments such as a cultivator or a branch saw; in the twinkling of an eye the TrimmerPlus turns into a diversely usable garden equipment system

TrimmerPlus®

The Extensive Plus

Our attachment program makes your trimmer still more versatile. In the twinkling of an eye it turns into a cultivator, a hedge trimmer a chainsaw or a blower.

Blower/Trimmer BT 720

Air flow velocity up to 230 km/h. Two functions with one tool.

Hedge trimmer AH 720

Length approx. 41 cm, replaceable blades for vibration-free working, adjustable in 4 angled positions

Pole saw PS 720

Length approx. 20 cm,
automatic chain lubrication, extension inclusive

Cultivator GC 720

Heat treated Ø 21 cm steel tines, heavy duty gearbox for longevity, adjustable tine width of 15 or 23 cm

Durable and low maintenance

FRONT TINE TILLERS

Ease the work even under difficult conditions

The desire for home-grown vegetable leads to growing demands for the right cultivation equipment. MTD offers you an extensive selection for every purpose. MTD front tine tillers are characterized by power and added features. They have front mounted tines with an adjustable working width. The self-sharpening tines made of special steel cut especially deep and can thus break up the ground completely. They are durable and low in maintenance.

Foldable transport wheel

MTD Front Tine Tillers are equipped with a foldable transport wheel for easy transportation. It can conveniently be folded upwards to work with the tiller.

(Front transport wheel for models T/205 and T/245, rear transport wheel for models T/330 M and T/380 M)

Plant protection shields

The Front Tine Tillers T/245 and T/380 M are equipped with plant protection shields which keep the tines off young seedlings.

Accessories for T/330 M & T/380 M

Iron wheels

196-261-678

ideal if best possible grip is required

Lister

196-262-678

ideal plow for the toughest terrain

Potato digger

196-263-678

essential accessory for potato harvest

Wheels

196-264-678

ideal if using iron wheels is undesired

Cultivator

196-265-678

convenient accessory for tilling of fallows or to intermix compost into the soil

The benefits at a glance

- *Direction: forward (and reverse on model T/380 M)*
- *Compact design*
- *4 (2x2) self-sharpening heat treated tines made from spring steel to tackle the toughest terrain*
- *6 (2 x3) tines on model T/380 M*
- *Comfortable start*
- *Height-adjustable handle*
- *Foldable transport wheel*
- *Plant protections shields on T/245 and T/380 M*
- *Adjustable working width on model T/330 M and T/380 M*
- *Adjustable depth bar stake on model T/330 M and T/380 M helps anchor the tiller and adjust working speed and depth*
- *Fixed depth bar stake on model T/205 and T/245*

Ground breaking performance

REAR TINE TILLERS

Ease the work even under difficult conditions

MTD rear tine tillers have a tine unit mounted behind the axle. Important safety aspect: The housing covers the blades completely and is fitted covers on the sides. This way you achieve an even and fine ground surface. The self-cleaning tines made of special steel are wear-resistant and self-sharpening. Excellent results even on difficult ground – these MTD machines will do the work for you.

Dual-Direction of model T/450

- Forward and reverse gear
- Two tine turning directions: forward rotation for loosing ground and reverse rotation for breaking up hard soil.

Weight (approx.)	72 kg	105 kg

The benefits at a glance

T/405 M:

+ *Direction: forward and reverse*
+ *Counter rotating rear tines for deep digging up*
+ *16 self-sharpening heat treated tines made of spring steel to tackle the toughest terrain*
+ *3 positions handle height adjustment*

T/450:

+ *Forward and reverse gear*
+ *Drive and tine turning direction centrally adjustable at handle*
+ *Chain reduction drive with a permanently sealed chain case for years of maintenance-free operation*
+ *4 (2x2) self-sharpening heat treated tines made from spring steel to tackle the toughest terrain*
+ *Continuously height adjustable handle for ergonomical and safe working*

Tilling by yourself

CULTIVATOR

Ideal to prepare the soil for sowing

The MTD electric cultivator T 30 E is the perfect gardening tool for loosening up and aerating soil. It consists of 4 rotor tines with a diameter of 230 mm. Equipped with a 1400 watt electric motor and a working width of 30 cm, it helps you loosen up even the most compacted soil without destroying the natural stratification. Robust wheels guarantee easy guidance. The electric cultivator from MTD has a foldable handle, an integrated carry handle, and an aluminium transmission case.

The benefits at a glance

- + *Forward gear*
- + *Compact design*
- + *4 (2x2) self-sharpening heat treated tines*

Easy to use and emission-free

ELECTRIC CHAINSAWS

The high-performing electric chainsaws by MTD are the ideal equipment for all types of sawing work around the house which can be done within cord length. This includes tree trimming and the cutting-down of fruit trees, the building of an arbour in the garden, and the cutting of firewood as well as small wood and branches.

Fewer vibrations from the handle featuring a partly rubber covering, an ergonomic build, an engine casing made of fibreglass-reinforced plastic as well as a slim, well-balanced body are additional deciding factors that speak for an electric chainsaw.

A load of power for clean energy

PETROL-POWERED CHAINSAWS

Petrol-powered chainsaws by MTD are the ultimate helpers for woodworking in the garden or for cutting firewood. Stand-outs in terms of money for value, all models feature teeth and chain interception bolts made of metal. Special fasteners for the fuel and oil tanks can be easily opened and closed without the need for tools. An anti-vibration system makes work ergonomical and less tiring and enables optimal command of the device. The MTD Top-Handle chainsaw GCS 25/30 T is specially suitable for operation on trees. The handle is placed directly on the engine block. Combined with a bar length of 30 cm it is very compact and can be used even in places which are difficult to reach.

Preparation and Safety

Especially when it comes to chainsaws, MTD places great importance on safety. Easy-to-understand symbols on the device support its handling. The bright red colour makes this equipment well visible at all times. Of course, all the devices also feature the GS label (for proven safety).

Before use, MTD recommends you seek professional advice. Today, many organisations, such as DEULA, provide courses on woodworking. It is also important to remember to wear protective clothing and footwear with each use, in addition to hearing and face protection. Petrol-powered chainsaws create poisonous emissions as soon as the engine is started, which could be odourless and invisible. Therefore, never use petrol-powered chainsaws in enclosed or poorly aired spaces. The surface of the working area should also be checked in advance, as dampness and snow, for instance, and icy declines on uneven terrain or freshly stripped wood (bark) can cause slippage and are dangerous as a result.

Vacuums, blows, chops

CHIPPER VACS/BLOWER

Say goodbye to autumn leaves

No matter how much leaves you have to pick up, MTD offers you the right machine. Our chipper vacs help to keep your garden clean without any effort. The powerful vacuum which is generated by internal rotating blades picks up leaves and litter from the ground, grinds them into particles to achieve the greatest possible collection volume and finally leads them into the collector bag. And no matter which size you decide for - the collector bag is easy to empty in any case.

Our blowers with 4-cycle engine and airflow volume of up to 240 km/h make cleaning up your property easy. They do not only remove leaves but also litter quickly and easy and thus they can be used throughout the year. Do you want to clean a larger area from leaves and litter and at the same time save your back? Then, the MTD backpack blowers are what you are looking for. The backpack design and the padded hip belt reduce operator fatigue, fit the shape of your hips and reduce pressure points.

The benefits of model 202 at a glance

- *Self propelled chipper vacs enable more comfortable work*
- *Pneumatic tires enhance manoeuvrability and stability*
- *Dual front lockable caster wheels enable to drive around obstacles easily*
- *106 litre bag and safety goggles included*
- *Two chipping blades of hardened steel*
- *Shredder function*
- *Ergonomic handle*
- *Separate branch feeder*

INNOVATION 2013

Your garden waste will simply disappear!

PETROL CHIPPER/SHREDDERS

Powerful shredding

The new MTD chipper/shredders 450 and 475 really make a good job of it: they reduce the volume of green waste, no matter whether this is made up of small branches, bushes or garden debris, and turn it into valuable compost and mulching material. They conform to the newest standards and safety requirements. The versatile petrol chipper/shredders have two separate feed options: a large drop-in hopper for small branches and debris as well as a dedicated chipper chute for larger branches. The casings and hoppers are made of steel and are very robust. In addition, model 475 has a chipper chute made of plastic for feeding in branches. The sensible material mixture prevents the device from becoming unnecessarily heavy. The reliable and powerful engines drive the hardened premium blades in the chipping mechanism so hard that they can easily process branches of thicknesses between 38 and 50 mm. The mechanism has no problem with fallen leaves, garden rubbish and hedge clippings. Even when wearing thick gloves, transport is made easy by a large and stable handle on top of the hopper as well as pneumatic tires. The scope of delivery consists of protective glasses and a large collecting bag with a capacity of 90 litres.

The benefits at a glance

+ Ideal for every garden
+ Powerful

LOG-SPLITTER

Turn a chilly winter's day into warm moments by the fireside

Who does not like it to comfortably sit by the warming fireside in winter while it is really cold outside? When log splitting is as easy as with the new log splitter of MTD, this is even more fun.
The replaceable cutting wedge and the powerful Briggs & Stratton engine enable to split pieces of wood with a maximum log size of up to 63,5 cm. With a tonnage of 25 t the MTD log-splitter easily does the work. The 2 hand operating system ensures safe working at any time.

MTD SNOW THROWERS

For everyday use

Even in winter you are ideally equipped with MTD snow throwers, which considerably ease snow-clearing. Our two stage snow throwers with wheel drive or track drive are perfect for clearing medium-sized and large areas. Choose from a extensive range the machine that best suits your needs. But also for small areas MTD offers with the single stage snow thrower the perfect machine for everyday use.

In our extensive range you can find the following snow throwers:

single stage snow thrower

two stage snow throwers

two stage snow thrower with track drive

With clearing widths from 53 cm to 76 cm and intake heights from 28 cm to 53 cm you can clear snow in the twinkling of an eye and spend less time in the cold. All MTD Snow Throwers are equipped with a powerful MTD SnowThorX engine. They provide rated powers from 2,2 kW up to 7,4 kW at 3600 min^{-1}. In addition, all two stage snow throwers are equipped with MTD's unique „Xtreme-Auger".

Please find more detailed information in the MTD Snow Thrower Catalogue.

Your parts specialist
for gardening and forest equipment

- every common brand
- in reliable MTD quality
